Mil-Con Antennas & Accessories

Wood Dale, IL– June 2010 – Mil-Con, Inc. introduces a new series of Antennas and Accessories; intended for tactical applications, to its product line.

These antennas are available with RF-tuned sealed-in-unmated-condition connectors or standard seals. Connector interfaces available are: three versions of SMA; standard interface with gloved-hand operable coupling nut, spin-on SMA (extra-rugged), and spin-on SMA with standard SMA interface. Also available is a ruggedized SMB, as well as two versions of TNC; spin-on TNC, and standard TNC.

Features to note:

- Based on COTS Quadrifilar helix antenna element technology and COTS patch antenna elements.
- Low-loss extra durable Raydome. Excellent UV protection, low water absorption and low temperature fracture resistance. Excellent RF performance.
- QFHA versions include improved match and center frequency accuracy over COTS standards, and PkZ® technology for thermal shock survivability.

Mil-Con, Inc. is a global manufacturer of military connectors, antennas, cable assemblies, and sub-assemblies with a focus on the military ground communication market. Markets served include: man-pack radios, hand-held radios, vehicular mount radios, and secure encryption. Mil-Con is a subsidiary of The Phoenix Company of Chicago.
